Abstract of corresponding document: **US6041842**

PCT No. PCT/FR97/00075 Sec. 371 Date Sep.

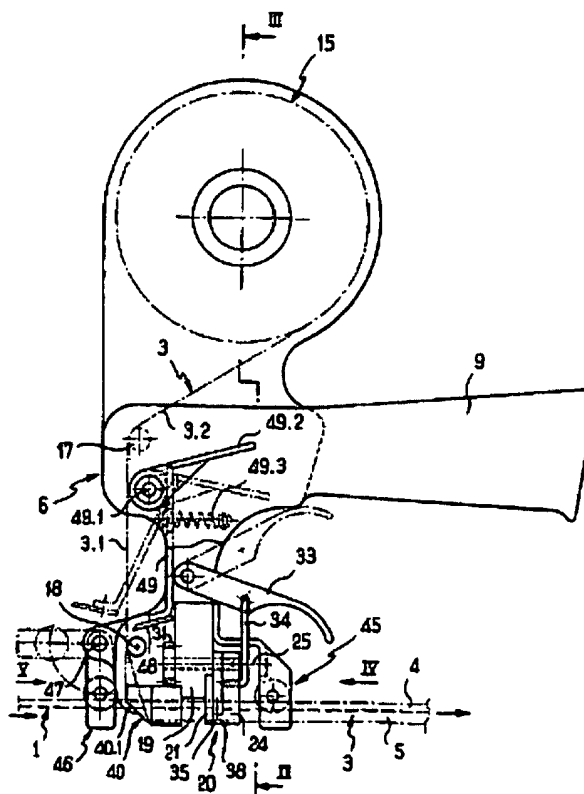

14, 1998 Sec. 102(e) Date Sep. 14, 1998 PCT

Filed Jan. 17, 1997 PCT Pub. No. WO97/26664

PCT Pub. Date Jul. 24, 1997 The invention

concerns a tool for sheathing a bundle (1) of wires (2) by enveloping this bundle in a flexible adhesive ribbon (3) which is transversely wound about itself around the bundle (1) and whose longitudinal edges (5) are joined by gluing. It

comprises a frame (60) equipped with an enveloping head (65) comprising a shaping device (68) for the ribbon (3) which is mounted in a fixed manner on the frame (60) and which possess a return edge (70) in the shape of a V arranged so as to start a longitudinal folding of the ribbon (3), and at least one first pair of clamping jaws (72) mounted on the frame (60) which are movable between an open position and a closed position in which they are applied against each other by means of return means to ensure the gluing of the longitudinal edges (5) of the ribbon (3) against each other and they define between themselves a passage orifice (79) for the sheathed bundle (1).
